EDUCATION

Metropolia,
Information technology bachelor's Degree 2020-Present

University of Helsinki, Fullstack WebDev MOOC

In this course I learned about MERN-stack and how to build single page application with it. I also learned about testing, project structure, webpack, redux state management and a lot of other things about JavaScript and web development in general.

University of Helsinki, Java-programming MOOC

In this course I learned all the fundamental things about Java and object-oriented programming in general.

Omnia, Information technology 2016 - 2019

In Omnia I learned to build websites using PHP and MySQL and learned to use Linux for development. I also used a lot of time to decide what I want to do, in the end I settled on web development.

WORK EXPERIENCE

Frantic, Jan 2019 – Jun 2019

I did Omnia's on-the-job learning period at Frantic as site builder trainee. My work was consisted of updating and adding files to CMS, I also updated CSS files that were not in the CMS.

City of Vantaa, Jun 2017 - Aug 2017

Summer job in Myyrmäki's Library as librarian trainee. Whilst I was there, I helped customers with their IT problems and did some logistic work and used the library's database system

PROFILE

I'm easy going 19-years-old Finnish information technologies engineering student in Metropolia and I'm looking for a part time job, that I can do alongside my studies.

I'm keen on learning all kinds of stuff, it really doesn't matter what it is, but it must be somewhat interesting. I especially like coding and technologies just for that reason; I can always learn new interesting stuff and it never ends. I also like the problem solving and mathematics aspect of coding.

On my spare time I code, go to the gym, hang out with my friends, learn from interesting Youtube videos, play guitar and draw.
